

Pricing Apps

The NextGen Pricing Applications

are designed to:

- Support the training of new buyers in a matter of hours not weeks
- Guard against the tendency of unsure buyers to under-price
- Raise bottom-lines—"leave less on the table"!
- Cut price/brand researching and buying time dramatically
- Free up owner/manager time by spreading buying responsibilities
- Improve pricing transparency, consistency and customer trust

The Children's and maternity application includes more than 8000 brands and over 500 types of clothing, footwear, accessories, toys & equipment. It:

- generates price suggestions based on item type (category), features, brand and condition. It is updated continually
- calculates amounts owed for items being purchased a) outright or b) on consignment
- provides instant on-line price checks by brand, category and any descriptors
- identifies any items recalled by the Consumer Product Safety Commission(CPSC) and National Highway traffic Safety Division(NHTSD).
- provides size tables for converting clothing & footwear sizes peculiar to foreign countries and particular labels to the numerical North American Standard
- provides a currency converter to translate foreign prices to U.S. or Canadian currency

- includes a quick reference on car seat expirations by brand
- calculates store credit owed sellers or consignors electing to spend their proceeds in the store

The Women's Pricing Application

includes over 100 categories and nearly 8000 brands. It covers Juniors, Misses, Women's & Plus Sizes. It:

- suggests the best price and price-range at which an item of apparel, accessory or piece of jewelry will sell based on Item type (category) and brand. "Suggested prices are primarily a function of retail prices, but may be adjusted to fit a store's market considering past sales, selected competitor sales, & market demographics. Based on sales of multiple stores across the country and on ongoing retail price-checks, suggested prices and price ranges are ever-changing, forever current.
- calculates amounts owed for items being purchased a) outright or b) on consignment
- provides instant on-line price checks by brand, category and any item descriptors
- provides size tables for converting sizes peculiar to foreign countries and particular labels to the numerical North American Standard
- provides a currency converter to translate foreign prices to U.S. or Canadian currency
- calculates store credit owed sellers or consignors electing to spend the proceeds in the store

The Men's Pricing Application

includes nearly 50 categories of clothing and footwear and nearly 2000 brands. It covers Men of all ages. It:

- suggests the best price and price-range at which an item of apparel or footwear “Suggested prices are primarily a function of retail prices, but may be adjusted to fit a store’s market considering past sales, selected competitor sales, & market demographics. Based on sales of multiple stores across the country and on ongoing retail price-checks, suggested prices and price ranges are ever-changing, forever current.
- calculates amounts owed for items being purchased a) outright or b) on consignment
- provides instant on-line price checks by brand, category and any item descriptors
- provides size tables for converting sizes peculiar to foreign countries and particular labels to the numerical North American Standard
